PASSION FOR LIFTING

9661C

Extension Quick System and Smart Extension Sequence
Fast, precise, safe

Heavy duty hook attachment
Ruggedness and durability in all applications

Link on second boom
Boom negative angle allows access to confined spaces

Link on column
Constant lifting capacity on all main boom positions

Break the boundaries in performance and safety

Endless slewing
Efficient use in all the vehicle positions

Ergonomic control station and user-friendly interface
Comfortable, convenient and safe

Always stable
More than 40 stabilizer combinations available

Breaking through innovations

PATENTED

Operator Auto Detection

Detection and automatic activation of the operator's closest stabilizer.

The PDM (Proximity Detection Module) installed on each stabilizer allows to automatically activate the operator's closest stabilizer, avoiding potential human error.

- Enhanced Safety
- Time Saving
- Huddle Free

Auto Levelling System

Keep truck horizontal for best crane's performance.

This system automatically keeps the truck frame in horizontal position, enabling the crane to perform always at its best.

- Increased efficiency
- Enhanced safety
- More reliability

Dynamic Load Diagram

Crane lifting capacity always under control in all stabilizer positions.

After the truck has been stabilized, the operator selects the load weight to be lifted. The display shows the permitted crane outreach based on the truck stability and load selected.

- Improved efficiency
- Easy to use
- Optimised safety

Magic Touch

Crane Automatic folding/unfolding.

This system allows the operator to unfold the crane to a working position and fold the crane from any position to transport position by pressing a single button on the radio transmitter or display.

- Easy to start and close
- Time saving
- Increased productivity and safety

High-tech development

- Structures optimised for strength, weight and speed

Top Protection

- High value retention
- Top reliability

Endless performance

Continuous rotation and extreme flexibility

Endless slewing allows the crane to be operated without restrictions. The complete access to the working area, eliminates the need to reposition the truck, optimizing precision, productivity and safety.

- Top efficiency
- Easy to use

Compact and light architecture

Uniquely designed to reduce the space occupancy behind the cabin made for increasing payload and truck floor area.

9661C crane is the strongest in its range 63.2 tm

Crane control system (C€)

P - Class

- Proportional stabilizers control
- Proportional slewing control
- Truck side independent

- Stabilizer's cylinders not on the ground
- 0% stabilizer's beams and stabilizer's cylinders on the ground
- 50% stabilizer's beams and stabilizer's cylinders on the ground
- 100% stabilizer's beams and stabilizer's cylinders on the ground
- Nominal pressure

⊕ The percentages present in the pictures are merely examples and they have no bearing on the cranes' real lifting capacities. The cranes' real lifting capacity will depend on truck's stability.

Human machine interface

Smart Top monitor 7"

Up to 16 languages available into the software. Top choice available for the range. Data statistics and crane management, all included into a 7" TFT monitor giving to the operator a higher level of awareness of the crane.

Crane controls

LCD Remote control

Each transmitter is equipped with 8 ergonomic proportional levers (6 for Scanreco mini) to control up to 8 functions of the crane. Using two hands, the operator can move 2-3-4 functions at once. This ensure more speed in loading or unloading operations with high precision.

Graphic remote control

Top visualization on 3" graphic display on the remote transmitter. Improved crane data visualization and crane control. Top level class of offer in the range.

9661C Technical data

Standard

- Designed in accordance with EN12999+EN13849
- Design class: HC1-HD5
- Multifunction radio remote control
- Sauer Danfoss PVG32
- Flanged valves
- One site auxiliary manual controls (on column)
- P-LCS Proportional Lift Control System
- EQS Extension Quick System
- SDV Smooth Descent Valve
- Red Power
- 7" color display
- High pressure oil filter
- Load sensing pump predisposition
- Stabilizers control valve
- Hydraulically extendable stabilizers
- Fixed stabilizer cylinders
- Swivel stabilizer foot
- Stability Control System (CE)
- Visual warning device for closed stabilizers (CE)
- P Class - Crane Control System (CE)
- Smart Top monitor 7" - Human Machine Interface (CE)
